climate change adaptation planning

Description

**Climate Change Adaptation Planning:** The process of analyzing, selecting, and prioritizing actions in response to climate change impacts. It is focused on addressing both short-term and long-term climate change impacts on human life, property, economic continuity, ecological integrity, and community function. ([Adapt New South Wales](https://www.adaptnsw.nsw.gov.au) and [IPCC 2014 Report](https://www.ipcc.ch/report/ar5/wg1/
